

ONE-TOUCH CRUISE CONTROL SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A vehicle cruise control system comprises a plurality of pre-set cruise control speed buttons
and cruise control logic circuitry coupled to the pre-set cruise control speed buttons. Each one of the
pre-set cruise control speed buttons corresponds to a respective pre-set cruise control speed. The
cruise control logic circuitry is configured for implementing control of a vehicle speed to maintain
the respective pre-set cruise control speed corresponding to a selected one of said pre-set cruise
10 control speed buttons.
